

Cookie Policy

What Are Cookies

Cookies are text files that are created when you visit a website. Each time you go back to a website the browser retrieves and sends this file to the website's server. When you fill your data on the contact pages or any comments, cookies remembers these details for next time.

We used cookies on our website to give our users a personalised experience when visiting our website.

How cookies are used

Cookie called PHPSESSID is set by the server automatically so that the server knows you're having a browsing session. It does not record any personal info. It only lasts for the current session, and is a required cookie. The cookie cannot read any data from your system hence your privacy and security is unaffected.

Sometimes trusted third parties cookies are used. For example- Google Analytics, social media plugins.

How to clear cookies

Microsoft Internet Explorer and Chrome browsers allow users to set their own limitations to the number of cookies saved on their system.

To clear all of your browser cookies, please clear your browsing history and ensure the "cookies and other site data" is checked.

Disabling and removing the cookies from your system can affect the function of some of the features of the website.
